

NECA—Partner in Innovation

**National Electric Vehicle
Infrastructure Working Council**

The Strength of NECA

For over a century, the National Electrical Contractors Association (NECA) has delivered the highest quality electrical power, lighting, HVAC, and communications products and services to buildings and communities across the United States and has become the clear voice of our nation's \$130 billion electrical contracting industry.

Power of the Partnership

- Breadth of Network
- Developing Codes and Standards
- Green Energy Focus and Expertise
- Emphasis on Member Education and Training
- Powerful Legislative Influence
- NECA Resources

Breadth of Network

- National and four regional offices
- 119 local chapters in 50 states
- 4000+ members across the U.S.
- Highest quality and most extensive network of qualified electrical professionals available

Codes and Standards

- NECA and the National Electrical Code™
- NEIS™ defines “neat and workmanlike”
- ANSI-approved with industry participation
- 40 standards in place
- Electrical work categories covered
- EV Charging standard under development

Green Energy Focus & Expertise

- ES Task Force exploring range of technologies and opportunities.
- Customizing “total energy solutions” to meet unique needs of customers.
- Delivering affordable, environmentally sound, responsible services.
- Developing standards for safety, performance and quality.

Powerful Legislative Influence

- Largest specialty contractor PAC is ranked second in the construction industry.
- Positively influencing legislation on key issues of energy efficiency, renewables, tax reform and small business.
- Expert legislative staff supported by technical expertise.

Emphasis on Education & Training

- Over 200 MEI seminars and workshops
- Craft training at 285 training centers
- Management and technical workshops at annual NECA Convention and Show
- Online and custom training available
- Supported by ELECTRI research

Committed to Continuous and Clear Communication

- Connecting to members across digital and print channels.
- Reaching the industry through award-winning trade magazine, *Electrical Contractor*.
- Bridging the supply channel with the premier annual tradeshow event, NECA 2010 Boston.
- Speaking to the business community and the public through effective, targeted public relations.
