

Richard G. Richels
Senior Technical Executive
Climate Change
Environment

Dr. Richard Richels is a Senior Technical Executive at the Electric Power Research Institute (EPRI).

His current research focus is the economics of mitigating greenhouse gas emissions. In previous assignments, he directed EPRI's energy analysis, environmental risk, and utility planning research activities.

Dr. Richels has served on a number of national and international advisory panels, including committees of the Department of Energy, the Environmental Protection Agency, and the National Research Council. Dr. Richels was a lead author for the Intergovernmental Panel on Climate Change's (IPCC) Second, Third, and Fourth Scientific Assessments and served on the Synthesis Team for the U.S. National Assessment of Climate Change Impacts on the United States. He also served on the Scientific Steering Committee for the U.S. Carbon Cycle Program.

Dr. Richels is currently serving on the National Research Council's Climate Research Committee; the Advisory Committee for Carnegie-Mellon University's Center for Integrated Study of the Human Dimensions of Global Change; and the U.S. Government's Climate Change Science Program Product Development Advisory Committee.

Dr. Richels received a Bachelor of Science degree in physics from the College of William and Mary. He was awarded a Master of Science and doctorate degrees from Harvard University's Division of Applied Sciences where he concentrated in decision science. While at Harvard he was a member of the Energy and Environmental Policy Center.
